

ÔLIVER BLANDI

# OUR STORY

In design, as in nature, it is opposing elements that often combine to create the most intriguing and beautiful moment.

Beauty is found where opposing themes meet. Only when night balances day, do we experience the magic of a sunrise.

Our story was forged out of a similar balance in contrast. We met as students in a goldsmithing workshop and the connection was magnetic. Two polar opposites pulled together by a shared passion to create. One inspired by the new, the other deeply in love with the elements of antiquity.

In this push and pull, we found a balance that devdeveloped into a style reflective of who we are and what inspires us.

# OUR STORY

Our signature shattered setting was born purely by accident in the way the best ideas often are.

A quest to push the design limits on a new type of stone cut for our engagement rings resulted in the shattering of the stone. Instead of abandoning the project, we forged on; setting the broken pieces back together as separate, uneven shapes.

Together, these shapes came together to form something even more beautiful than the original. With our first shattered gold and metal collections, our design philosophy manifested itself right before our eyes. Standing as a metaphor for all of the imperfect yet perfect moments and people that give our lives meaning. The beauty and meaning is not in the shattering, but in how the pieces are put back together.

We hope that each piece we craft gives you a sense of deeper meaning that carries with it a
